Watch them shape the world instead of conforming to it.

Today's culture doesn't exactly teach our kids to value the things that God says are important. So it's nice to know you're preparing them to live with character, courage, and integrity as they seek to have a positive influence on the world.

On behalf of the Florida Parent-Educators Association, I want to invite you to attend the 2020 Annual FPEA Florida Homeschool Convention. We are celebrating this year with the theme, Wild Florida – Live Free! #noregrets. Our freedom to explore is intricately aligned with our freedom to homeschool — and to do both in a way that best suits our family. The Convention is scheduled for May 21-23 at the Rosen Shingle Creek Resort and Convention Center in Orlando, a venue that truly embraces Florida’s wild heritage and vintage charm.

We are the biggest and the best Convention for homeschooling families in the country. There is something for everyone — education, entertainment, encouragement and great shopping! This year we are excited to bring you two incredible keynote speakers. Rick Green will be greeting us Friday morning with a message of inspiration and encouragement to jumpstart the weekend. Saturday morning, Zan Tyler will join us with a fantastic session that will remind you just how precious this season of homeschooling really is.

These are only two from the exciting slate of speakers we have in store for you. You’ll see some familiar faces, but some, like Tricia Goyer and Linda Lacour Hobar, are making their first appearance at our convention. All of our speakers and each of their sessions have been carefully selected to help us celebrate our freedom to homeschool as we see fit.

Take your time to peruse these offerings as well as the many exciting events for the entire family. Then, log onto www.fpea.com and REGISTER!

Looking forward to seeing you there!

**Loving Florida - Living Free,
Suzanne Nunn, Chairman**

1. NATURE DEFICIT DISORDER

ANDREW PUDEWA
SEBASTIAN I1-2

"Nature Deficit Disorder" refers to the costs of alienation from nature. Among them are diminished use of the senses; attention difficulties; and higher rates of emotional, physical, and social imbalances. It can affect individuals, families and communities. Although we as homeschoolers strive to provide the best education for our children, we may also be overlooking the importance of sufficient time in a natural environment, an essential component of raising children who recognize and long for goodness, truth and beauty.

2. HOW TO WRITE A NOVEL

TRICIA GOYER
SEBASTIAN I3-4

One of the most frequently asked questions I get is "How do you write a novel?" Almost anyone can write a novel, but it takes time, persistence and skill. From tool recommendations to my writing journey, learn what steps you can take to write a novel.

3. STOP MELTDOWNS AND ENDLESS ARGUMENTS WITHOUT YELLING

KIRK MARTIN
SEBASTIAN J

Have a relentless arguer who creates power struggles over everything? Want to

learn how to calm an explosive child? Come learn how to stop the yelling, arguing and power struggles with toddlers and teens from morning to midnight. We promise you will laugh and leave with a dozen practical strategies that really work.

4. OFF THE BENCH: HOW YOUR FAMILY CAN GET ON THE FRONT LINES IN THE BATTLE FOR FAITH, FAMILY AND FREEDOM

HEIDI ST. JOHN
SEBASTIAN K

"I see the threats, but I don't know what I can do!" If this describes you, you're not alone. Most parents today see big problems on the horizon but are not sure how to make a difference in the battle. Join Heidi St. John as she teaches five ways you can get off the sidelines and onto the frontlines. Learn to engage and encourage others to do the same.

5. TEACHING THE PHYSICS OF EVERYDAY LIFE

BLUE COLLAR MIND
PANZACOLA F1

We are surrounded by incredible things in our everyday lives. From electromagnetic waves, thermodynamics, psychometrics, electricity and all different types and states of matter. Some of the best science lessons we can teach our children are right under our noses, ready to be discovered and learned.

6. CREATING AND ACHIEVING OUTCOMES IN LEARNING

CALVARY CHAPEL CHURCH INC.
PANZACOLA F2

Why did you make the decision to homeschool your children? What do you

hope to achieve through homeschooling? How are you preparing your child for their future? In this workshop, you'll learn how to identify your child's needs, set specific outcomes for your child's education based on those individual needs and build a plan to help you achieve them. This is the basis of outcome-based learning. Outcome-based learning can be applied to any student, with any curriculum, with any challenges, in any family.

7. BLOOD AND MORALITY: THE TRADITION OF ADVENTURE WRITING FOR BOYS AND THE FORMATION OF VIRTUE

MARTIN COTHRAN
PANZACOLA G1

What early 20th-century writer made a bet with a friend that he could write a book more famous than Treasure Island — and won? Which modern science fiction writer couldn't even drive a car? Who were the greatest influences on J.R.R. Tolkien, author of The Lord of the Rings? Martin Cothran tells these stories and many others about the writers who produced many of the great adventure books for boys, books that invoked a vision of masculinity that at once taught young male readers how to deal with the challenges of life and what moral code they should live by. In the process, you will learn why these stories speak to boys in a way that other books do not, and why that is not only OK, but good. He will also give a list of great boys literature which will not only help your student make sense of his own actions, but will help you to understand him.

WORKSHOPS

8. HOMESCHOOL 101

VICKI LEIST, FPEA
PANZACOLA G2

Are you new to homeschooling? This workshop is just for you. Hear valuable information on understanding your rights, responsibilities and available resources. 9. FROM MICROSCOPE TO TELESCOPE: OBSERVING GOD'S PERFECT DESIGN AND OUR SPECIAL POSITION IN CREATION

SHERRI SELIGSON
PANZACOLA H1-2

When the telescope was invented, it pierced the vastness between us and distant worlds, opening up so many realms of creation that our world seemed to shrink into one remote corner. Yet our position in our galaxy of stars is such that we are able to observe this glorious creation, and our position in the solar system provides us with ideal living conditions. The microscope, invented at about the same time in history, laid open a scene no less wonderful: entire worlds teeming with life on the tiniest grain of sand. One device leads us to see a solar system with every star and the other a world in every atom. This workshop will highlight the physical principles of atoms, the Earth and the universe, and how the same God who supports the universe in the hollow of His hand holds every atom together.

10. THE TRUTH ABOUT WHEAT

SUE BECKER
PANZACOLA H3-4

11. LOOKOUT SAT AND ACT, THERES A NEW TEST IN TOWN — THE CLT

JEAN BURK
PANZACOLA F3

College entrance tests are here to stay but students now have a new option that doesn't include the dreaded SAT or ACT. The Classic Learning Test is quickly being adopted for entrance and scholarships by colleges across the nation. Families will love this test because they will find that the test's content isn't at odds with their core beliefs; the exam's approach represents traditional values that families adhere to by reconnecting intellectual pursuit and virtue.

12. HELP FOR THE HOPELESSLY UNORGANIZED CHILD: HOMESCHOOLING KIDS WITH ADD OR ADHD

MARIANNE SUNDERLAND
PANZACOLA F4

Do you have a child who is hopelessly unorganized? Can never find their backpacks, folders or soccer cleats? Often-times, these kids are not just disorganized with their belongings, but also with their thoughts. They have difficulty starting projects and once they've started them, they often lack what it takes to complete them. You may be interested to know that there is a name for this type of disorganization —

executive function — or in this case, a lack of executive function. In this class, we're going to look at what executive function is, how it affects organizational skills, and most importantly, how you can teach your seemingly hopelessly unorganized child to grow in this area.

13. A SAINT, A CRIMINAL AND A COUNTRY PRIEST: THE WRITING OF G.K. CHESTERTON

JIM WEISS

16. CHOOSE THE HARD THINGS, OR HOW TO KEEP GOING WHEN YOU FEEL LIKE GIVING UP

TODD WILSON
SEBASTIAN K

Homeschooling is hard, parenting is hard and marriage ... well, that's way hard. And that's OK and even normal. Trouble is we don't like hard. We want easy, fast and cheap, and at the same time we want successful results. But the truth is that good things are hard and hard things are good, and they go hand in hand. Sadly, most people don't ever experience the good because they can't handle the hard. They put the hard thing off, hoping it will get easier, or they avoid it all together, and all they end up with is a pile of regrets. Here's the good news: you can handle the hard. In fact, if you're faced with two choices, pick hard. During this hour, you'll laugh with Todd as he shares how to embrace the hardness while keeping your eye on the joy and experience God's best for you.

17. TRANSITIONING TO COLLEGE

PALM BEACH ATLANTIC UNIVERSITY

You'll also learn about scholarship opportunities that make this college option affordable.

18. FIVE STEPS TO A SUPERIOR SCIENCE EDUCATION

JEANNIE FULBRIGHT
PANZACOLA F2

There is a reason that American schoolchildren score at the very bottom on international science assessments. It is the ineffective way in which science is taught in schools. Most of us were subjected to this system and obtained only a cursory understanding of science. As homeschoolers, we have the freedom and opportunity to throw out those unproductive techniques. We can truly impart a deeper knowledge and love for science. Jeannie will share five vital steps, inspired by Charlotte Mason, that will ensure you impart a superior science education. 83. RAISING DANGEROUS SONS IN A SAFE AND MEDIOCRE WORLD

TODD WILSON
SEBASTIAN K

Let's face it, most men today are yellow-bellied, Lilly-livered weenies. They may wear tall Stetsons, drive fast cars, bungee jump from bridges, collect souped-up power tools and carry big Bibles, but they're weenies. They flex their biceps and proclaim their faith, but when the economy collapses, the newest pandemic hits the scene, a

family crisis arises or the going gets tough, they play it safe.

Truth is: God wants your sons to leave the heavily populated, safe waters and live dangerously. He wants your sons to trust dangerously, work dangerously and love dangerously. But, that doesn't come naturally. Everyone around them, from the talking heads in the media to pastors in the pulpit, keep repeating, "Play it safe." Here's a secret: dangerous living leads to joy, family happiness, and real success while safe living results in worry, family failure, and heartache.

So join Todd as he encourages you and your sons to get dangerous.

In 1984, the state superintendent of education told Zan Tyler that he could have her put in jail for homeschooling her son. Zan knew this was no idle threat. The shock and fear that riveted her and the imminent threat of being jailed forced her to count the costs of homeschooling and decide if it was really worth it. Zan learned some powerful lessons about fighting for freedom, family, and faith that remain pertinent today. Our nation is once again at a crossroads where the liberties we often take for granted are at stake. We must all continue to work to preserve life, liberty and the pursuit of happiness, while intentionally raising up a new generation of freedom fighters. But how do we do that? Come to this session to be encouraged and equipped with powerful principles to share with your children and teens.

THOMAS CLARK (MEMORIA PRESS)
SEBASTIAN I3-4

Since algebraic fractions are a much more complex form than arithmetic fractions, the memorization of the operational techniques generally taught in arithmetic simply will not hold in algebra. In this instructional workshop, Thomas Clark, founder of VideoText Interactive, and author of “Algebra: A Complete Course” and “Geometry: A Complete Course” humorously explains, in detail, the reasons behind the rules. Now students can develop a clear, conceptual approach to working with fractions, without a reliance on meaningless shortcuts and tricks, preparing them to be much more successful when working with algebraic fractions.
